

VIKRAM SINGH -- Senior-ish Everything Candidate
vikram.singh@email.com | +91 77665 54433

SKILLS

Python, Java, JavaScript, TypeScript, React.js, Next.js, Node.js, Express, Django, Flask, SQL, PostgreSQL, MySQL

PROJECTS

Project 1: a moderately detailed description of project number 1, covering what it does, which stack it uses, and v

Project 2: a moderately detailed description of project number 2, covering what it does, which stack it uses, and v

Project 3: a moderately detailed description of project number 3, covering what it does, which stack it uses, and v

Project 4: a moderately detailed description of project number 4, covering what it does, which stack it uses, and v

Project 5: a moderately detailed description of project number 5, covering what it does, which stack it uses, and v

Project 6: a moderately detailed description of project number 6, covering what it does, which stack it uses, and v

Project 7: a moderately detailed description of project number 7, covering what it does, which stack it uses, and v

Project 8: a moderately detailed description of project number 8, covering what it does, which stack it uses, and v

Project 9: a moderately detailed description of project number 9, covering what it does, which stack it uses, and v

Project 10: a moderately detailed description of project number 10, covering what it does, which stack it uses, and

Project 11: a moderately detailed description of project number 11, covering what it does, which stack it uses, and

Project 12: a moderately detailed description of project number 12, covering what it does, which stack it uses, and

Project 13: a moderately detailed description of project number 13, covering what it does, which stack it uses, and

Project 14: a moderately detailed description of project number 14, covering what it does, which stack it uses, and

Project 15: a moderately detailed description of project number 15, covering what it does, which stack it uses, and

Project 16: a moderately detailed description of project number 16, covering what it does, which stack it uses, and

Project 17: a moderately detailed description of project number 17, covering what it does, which stack it uses, and

Project 18: a moderately detailed description of project number 18, covering what it does, which stack it uses, and

Project 19: a moderately detailed description of project number 19, covering what it does, which stack it uses, and

Project 20: a moderately detailed description of project number 20, covering what it does, which stack it uses, and

Project 21: a moderately detailed description of project number 21, covering what it does, which stack it uses, and

Project 22: a moderately detailed description of project number 22, covering what it does, which stack it uses, and

Project 23: a moderately detailed description of project number 23, covering what it does, which stack it uses, and

Project 24: a moderately detailed description of project number 24, covering what it does, which stack it uses, and

Project 25: a moderately detailed description of project number 25, covering what it does, which stack it uses, and

Project 26: a moderately detailed description of project number 26, covering what it does, which stack it uses, and

Project 27: a moderately detailed description of project number 27, covering what it does, which stack it uses, and

Project 28: a moderately detailed description of project number 28, covering what it does, which stack it uses, and

Project 29: a moderately detailed description of project number 29, covering what it does, which stack it uses, and

Project 30: a moderately detailed description of project number 30, covering what it does, which stack it uses, and

Project 31: a moderately detailed description of project number 31, covering what it does, which stack it uses, and

Project 32: a moderately detailed description of project number 32, covering what it does, which stack it uses, and

Project 33: a moderately detailed description of project number 33, covering what it does, which stack it uses, and

Project 34: a moderately detailed description of project number 34, covering what it does, which stack it uses, and

Project 35: a moderately detailed description of project number 35, covering what it does, which stack it uses, and

Project 36: a moderately detailed description of project number 36, covering what it does, which stack it uses, and

Project 37: a moderately detailed description of project number 37, covering what it does, which stack it uses, and

Project 38: a moderately detailed description of project number 38, covering what it does, which stack it uses, and

Project 39: a moderately detailed description of project number 39, covering what it does, which stack it uses, and

EXPERIENCE

Software Engineering Intern, BigCo, Jan 2024 - Present

EDUCATION

B.Tech Computer Science, MNO Institute, 2025

CGPA: 9.1/10
